

SYLLABUS

Course description

Course code		Course	ZARZĄDZANIE ŚRODOWISKIEM I EKOLOGIA		
ME/O/I/ST/B1			ENVIRONMENTAL MANAGEMENT AND ECOLOGY		
Language of instruction		English			
Academic year		2025/2026			
field of study:		Mechanical Engineering			
field of specialisation:		All			
Educational level		first-cycle studies			
Education profile		General academic			
Mode of study		Full-time studies			
Semester(s)		1			
Affiliation with a group of classes		B 1. Group of obligatory course core subject			
Course status		Obligatory			
Types of classes, instruction hours, ECTS credits		Types of classes	Number of instruction hours	Number of ECTS credits	
		Lecture	15 [h]	1 ECTS	
Linkage of the course	with the education profile	Related to the conducted scientific activity in the discipline to which the field of study is assigned			0ECTS
	with qualifications	It is used to acquire engineering competences by the student			1 ECTS
	with science discipline	Mechanical engineering			1 ECTS
Form of teaching		Traditional – classes organized at the University /classes conducted using distance learning methods and techniques			
Prerequisites		Basic knowledge, skills and competencies in the field of: chemistry, physics, biology			
Department		Faculty of Mechanical Engineering			
Coordinator		Prof dr hab.inż. W.Żurowski			
The website of the basic organizational unit		http://wm.uniwersytetradom.pl			
E-mail address, phone number of the coordinator		wojciech.zurowski@uthrad.edu.pl			

LEARNING OUTCOMES, CURRICULUM CONTENT, TEACHING CLASSES, VERIFICATION OF LEARNING OUTCOMES

Learning Objective:	C1 - Introduction of students to basic problems of environmental protection, causes and after-effects of changes in environmental as an effect of economic and civilisation development.
	C2 - Presentation of possibilities and ways of environment degradation in the light of sustainable development.

Curriculum Content:	<p>LECTURES (15 h)</p> <p>Legal conditions of environmental protection. General ecology. (3 h);</p> <p>Ecology of ambient air, earth and water. Ecological aspects of health. Kinds of environmental pollution (anthropogenic, industrial and natural). (4 h);</p> <p>Environmental pollution as a result of industry and road transportation. Effects of environmental pollution (acid rains, the greenhouse effect, ozone hole, smog) (4 h);</p> <p>Conception of sustainable development. Methods of recycling and waste disposal. <i>Environmental management system</i> (acc. ISO 14001 and EMAS). (4 h)</p>
Didactic (educational) methods:	Informative and problem lecture containing discussion elements, and with the use of exposing methods (movies, ppt presentations).
Course assessment type, the criteria for assessing the achieved learning outcomes, and the method of calculating the final grade:	<p>Achieving of all required educational outcomes of learning are the condition for passing the course.</p> <p>Obtaining of positive grades from all form of classes is equivalent to passing the subjects and obtaining of appropriate number of ECTS credits.</p> <p>The way of final grade calculation is determined by the resolution of the Faculty Council.</p> <p><u>The way of final grade calculation of individual classes form:</u></p> <p>Any final grade is made on the basis of written tests from the knowledge obtained at the classes.</p>

Learning outcomes for the course in relation to the field of study learning outcomes and the type of classes				Methods of verifying learning outcomes	
Learning outcome number	Description of the learning outcomes for the course (PEU) A student who has passed the course (W) knows and understands / (U) can / (K) is ready to:	Field of study learning outcome (KEU)	Types of classes	Form of verification (credits)	Methods of testing and assessment
W1	has knowledge of management, including quality management, production management, logistics and conducting business activity;	K_WK21	Lecture	Graded credit	Written test
U1	can communicate using a variety of techniques in professional and other settings;	K_UK15	Lecture	Graded credit	Written test
K1	is aware of the non-technical aspects of the activities of a mechanical engineer, including, but not limited to, its social consequences and impact on the environment;	K_KO03	Lecture	Graded credit	Written test

Literature and teaching aids

Student workload required to achieve the assumed learning outcomes – the balance of ECTS credits		
Attendance, participation	Student workload [h].	
	Student's self-study hours Classes without a teacher (ZBN)	Classes
Participation in lectures/classes/lab	X	15 [h]
Preparation for lectures/classes/lab , Preparation for ... credit / exam	2 [h]	X
Total student workload Preparation for ... credit / exam	2 [h]/ 0,1 ECTS	15 [h]/ 0,9 ECTS
ECTS points per subject	1 ECTS	

Additional information, comments
<p>In the case of students with special needs, including disabilities, and chronic illnesses, the methods and forms of verification of learning outcomes specified above (in the syllabus) are adapted to the individual needs of these students, as appropriate.</p> <p>Detailed rules and forms of support for students with special needs, including those with disabilities and chronically ill, during classes, credits, and exams are specified in: University Regulations (Regulamin Studiów Uniwersytetu Technologiczno-Humanistycznego w Radomiu), Study Regulations (Zasady Studiowania), and Procedure for Ensuring Accessibility of the Educational Process to Students with Special Needs, Including Those with Disabilities and Chronically ill (Procedura dotycząca zapewnienia dostępności procesu kształcenia studentom ze szczególnymi potrzebami, w tym: z niepełnosprawnością, przewlekle chorych).</p>
