

SYLLABUS

Course description

| Course code | | Course | Ochrona własności przemysłowej i prawo autorskie | |
|---------------------------------------------------|----------------------------|---------------------------------------------------------------------------------------------------------------------|--------------------------------------------------|------------------------|
| ME/O/I/ST/E1 | | | Protection of industrial property and copyright | |
| Language of instruction | | English | | |
| Academic year | | 2025/2026 | | |
| field of study: | | Mechanical Engineering | | |
| field of specialisation: | | All | | |
| Educational level | | first-cycle studies | | |
| Education profile | | General academic | | |
| Mode of study | | Full-time studies | | |
| Semester(s) | | 1 | | |
| Affiliation with a group of classes | | E 1. Group of general courses - obligatory | | |
| Course status | | Obligatory | | |
| Types of classes, instruction hours, ECTS credits | | Types of classes | Number of instruction hours | Number of ECTS credits |
| | | Lecture | 10 [h] | 0,5 ECTS |
| | | Classes | [h] | |
| | | Lab | [h] | |
| Linkage of the course | with the education profile | Related to the conducted scientific activity in the discipline to which the field of study is assigned | | ECTS |
| | with qualifications | It is used to acquire engineering competences by the student | | 0,5 ECTS |
| | with science discipline | Mechanical engineering | | ECTS |
| Form of teaching | | Traditional – classes organized at the University /classes conducted using distance learning methods and techniques | | |
| Prerequisites | | knowledge of mechanics (statics) and mathematics | | |
| Department | | Faculty of Mechanical Engineering | | |
| Coordinator | | Dr Piotr Kobylski | | |
| The website of the basic organizational unit | | http://wm.uniwersytetradom.pl | | |
| E-mail address, phone number of the coordinator | | p.kobylski@uthrad.pl, (48) 361-74-58 | | |

LEARNING OUTCOMES, CURRICULUM CONTENT, TEACHING CLASSES, VERIFICATION OF LEARNING OUTCOMES

| | |
|-----------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Learning Objective: | This course provides an in-depth understanding of the legal frameworks governing industrial property and copyright. It covers the principles, regulations, and enforcement mechanisms related to patents, trademarks, designs, and copyright, emphasizing the importance of intellectual property rights in the business environment. |
| Curriculum Content: | Definition and types of intellectual property Importance of protecting intellectual property Patents: Definition, types, and criteria for patentability Trademarks: Definition, registration process, and protection Designs and Geographical Indications Industrial designs: Protection and registration Geographical indications: Definition and importance Definition and types of works protected by copyright Duration and ownership of copyright Registration process for copyright Licensing and transfer of rights Infringement: Types and consequences Remedies and enforcement mechanisms Overview of major international treaties (e.g., TRIPS, Berne Convention) The role of WIPO and other international organizations |
| Didactic (educational) methods: | Case study |
| Course assessment type, the criteria for assessing the achieved learning outcomes, and the method of calculating the final grade: | The condition for passing the course is to achieve all the required learning outcomes specified for the course |

| Learning outcomes for the course in relation to the field of study learning outcomes and the type of classes | | | | Methods of verifying learning outcomes | |
|--------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------|------------------|----------------------------------------|------------------------------------------|
| Learning outcome number | Description of the learning outcomes for the course (PEU) A student who has passed the course (W) knows and understands / (U) can / (K) is ready to: | Field of study learning outcome (KEU) | Types of classes | Form of verification (credits) | Methods of testing and assessment |
| W1 | understand the fundamental concepts of industrial property and copyright. | K_WG01 | Lecture | Test | Written test from 51% of correct answers |
| W2 | Analyze the legal protections available for inventions, trademarks, and creative works | K_WG02 | Lecture | Test | Written test from 51% of correct answers |
| W3 | Assess the implications of infringement and the enforcement of intellectual property rights. | K_WG12 | Lecture | Test | Written test from 51% of correct answers |

| Literature and teaching aids |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Primary literature: G. Michniewicz, Ochrona własności intelektualnej, Warszawa 2022 P. Goldstein, Copyright Law: Essential Cases and Materials, 2024 Additional literature: ----- Study aids: |

| Student workload required to achieve the assumed learning outcomes – the balance of ECTS credits | |
|--------------------------------------------------------------------------------------------------|-----------------------|
| Attendance, participation | Student workload [h]. |

| | Student's self-study hours Classes without a teacher (ZBN) | Classes |
|-----------------------------------------------------------------------------|------------------------------------------------------------------|----------------|
| Participation in lectures/classes/lab | X | 10 [h] |
| Preparation for lectures/classes/lab , Preparation for ... credit / exam | 2 [h] | X |
| Total student workload Preparation for ... credit / exam | 6 [h]/ 0,3 ECTS | 4 [h]/ 0,2ECTS |
| ECTS points per subject | 0,5 ECTS | |

| Additional information, comments |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>In the case of students with special needs, including disabilities, and chronic illnesses, the methods and forms of verification of learning outcomes specified above (in the syllabus) are adapted to the individual needs of these students, as appropriate.</p> <p>Detailed rules and forms of support for students with special needs, including those with disabilities and chronically ill, during classes, credits, and exams are specified in: University Regulations (Regulamin Studiów Uniwersytetu Technologiczno-Humanistycznego w Radomiu), Study Regulations (Zasady Studiowania), and Procedure for Ensuring Accessibility of the Educational Process to Students with Special Needs, Including Those with Disabilities and Chronically ill (Procedura dotycząca zapewnienia dostępności procesu kształcenia studentom ze szczególnymi potrzebami, w tym: z niepełnosprawnością, przewlekle chorych).</p> |
